

CLAIMS

I claim:

- 5 1. A portable television/cellular phone device comprising:
a handheld housing having front, back, top, and side walls;
a housing support member being hingedly attached to said
handheld housing for standing up said handheld housing upon a
surface;
- 10 a display screen being disposed upon said front wall of said
handheld housing;
a phone reception/transmission assembly being disposed in
said handheld housing and including a power supply being
replaceably disposed in said handheld housing and also including an
15 antenna being attached to said handheld housing; and
a television reception assembly being disposed in said
handheld housing.
- 20 2. A portable television/cellular phone device as described in
claim 1, wherein said housing support member is generally a lever
being hingedly attached to said back wall of said handheld housing.
- 25 3. A portable television/cellular phone device as described in
claim 1, wherein said phone reception/transmission assembly
further includes a numbers/symbols keypad being disposed upon
said front wall of said handheld housing and including a plurality
of button-like switches used to dial a phone number.
- 30 4. A portable television/cellular phone device as described in
claim 3, wherein said phone reception/transmission assembly also
includes a power switch being movably disposed through one of

1006572.030102

10085772.030102
said walls of said handheld housing and being connected to said power supply which is a battery pack, and further includes a microprocessor being disposed in said handheld housing and being connected to said numbers/symbols keypad and to said power switch and to said power supply and to said display screen upon which data is displayed, and also includes a receiver including a speaker being disposed in said handheld housing for receiving radio waves through said antenna, and further includes a transmitter being disposed in said handheld housing for transmitting radio waves through said antenna, and also includes indicator lights being disposed upon said display screen and upon said handheld housing for indicating power level for said battery pack and also displaying incoming calls.

5. A portable television/cellular phone device as described in claim 4, wherein said phone reception/transmission assembly also includes function switches being disposed upon said handheld housing and being connected to said microprocessor for selecting various telephone functions programmed in said microprocessor such as "caller ID", and further includes a phone connect switch being disposed upon said handheld housing and being connected to said receiver and said transmitter for receiving and transmitting phone calls, and also includes a phone disconnect switch being connected to said receiver and said transmitter for disconnecting phone calls.

6. A portable television/cellular phone device as described in claim 5, wherein said television reception assembly includes a conventional TV receiver being disposed in said handheld housing for receiving television signals through said antenna with the

television signals being conventionally transformed into pictures which are displayed upon said display screen.

7. A portable television/cellular phone device as described in claim 6, wherein said television reception assembly also includes television operation and control switches such as a TV connect switch, a channel selector switch and a volume control switch being disposed upon said handheld housing and being connected to said TV receiver and to said display screen.

8. A portable television/cellular phone device as described in claim 7, wherein said television reception assembly further includes a VCR jack being disposed through one of said walls of said handheld housing and being connected to said microprocessor for receiving input from a remote video recorder device, and also includes a CD player jack also being disposed through one of said walls of said handheld housing and being connected to said microprocessor for receiving input from a remote CD player device.
